Re Item V.

- 1 Reference is made to the following documents:
 - D1: PATENT ABSTRACTS OF JAPAN vol. 2000, no. 05, 14 September 2000 (2000-09-14) &; JP 2000 033937 A (KAO CORP), 2 February 2000 (2000-02-02)

2 INDEPENDENT CLAIMS 1,22 and 23

2.1

Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document) a container for cutting and dispensing select portions of a web material retained on a roll, from which the subject matter of claims 1,22 and 23 differs in that the container comprises

- -at least one molded end cap comprising a molded material comprising a detent substantially corresponding to the profile shape of the cutter track, a groove substantially corresponding to the profile shape of the dispenser, and a protrusion for accepting a roll of material (claims 1 and 23);
- -a pair of end caps comprising a cutter track holder engaging a respective end of the cutter track and a roll support(claim 22)

A typical disadvantage of known containers is the lack of a simple means to secure the mutual position of the roll of web material and the cutting assembly with respect to the dispensing container while still allowing the roll to easily rotate.

Without a means to fix the mutual positions of roll and cutting assembly it is possible to misalign them resulting in a poor cut, without fixing the roll and/or the cutting assembly in the dispensing container it is possible to inadvertently remove them from he container.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/US2005/002200

None of the documents found in the search report would suggest to the skilled person such a simple and effective solution to use a cap according to claims 1,22 and 23 with positioning means for the external dispenser,the roll and the cutter assembly comprising a cutter track and a shearing device.

5.1.3

Claims 2-21 and 24 are dependent on claims 1 and 23 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
